

SUPRIADI

Frontend Developer

Medan, North Sumatra | +6282277280453 | Supriadi.tech@gmail.com | linkedin.com/in/supriaditech | github.com/supriaditech

PROFESSIONAL SUMMARY

Frontend Developer with 3 years of experience specializing in the **Next.js, React Native, and TypeScript** ecosystem, supported by robust **Fullstack (NestJS)** capabilities. Masters modern frontend architecture including state management (**Zustand**), real-time data fetching optimization (**SWR**), and efficient **Git Flow** strategies. Proven **DevOps** expertise (Docker/VPS/CI/CD) in building **AI-based Education Platforms (OpenAI)** and **Payment Gateway** integrations. Currently focused on code refactoring and system scalability enhancements at PT. Permata Azzuri Sehat.

TECHNICAL SKILLS

- Frontend:** React.js, Next.js (Pages & App Router), React Native, TypeScript, Tailwind CSS, GSAP (Animation), React Hook Form.
- Backend:** NestJS (Microservices Architecture), Laravel, RESTful API.
- State & Data:** Zustand (Global State), SWR (Real-time & Mutation), Redux.
- DevOps & Infrastructure:** Docker, VPS Management (AWS, Alibaba Cloud, Contabo), Nginx, GitHub Actions (CI/CD).
- Integrations:** OpenAI API (Generative AI), Midtrans & Xendit (Payment Gateway), OpenStreetMap (Geolocation/Geofencing).
- Tools:** Git (Branching Strategy Design), Postman (API Testing & Collections), Figma (High-Fidelity Implementation).

WORK EXPERIENCE

- PT. PERMATA AZZURI SEHAT – Jakarta | *Frontend Developer Key Projects:* klinikme.com | helloklinikme.com | permataazzurisehat.com (March 2025 – Present)
- Migration & Modernization:** Spearheaded the legacy code migration process from JavaScript to **TypeScript** and performed Next.js version upgrades to enhance security and code maintainability for the company profile website.
 - Performance Optimization:** Implemented **SWR** for real-time data management and caching, and decoupled business logic into **Custom Hooks** to achieve Clean Code standards.
 - Component Architecture:** Re-architected component structure using **Atomic Design** principles and global state management with **Zustand**, facilitating long-term maintenance.
 - Complex Forms:** Developed laboratory result input modules with complex conditional logic validation using **React Hook Form**.
- PT. INDAKO TRADING COY | *Mobile Developer App:* [DarkoHr App \(PlayStore\)](https://darkohr.app) (Jan 2025 – Feb 2025)
- Fullstack Implementation:** Designed API Contracts and built REST APIs using **Laravel** for Organization and Announcement features.
 - Mobile Development:** Developed Splash Screen, Tour App, and UI Redesign features for the "DarkoHr" application based on **React Native**, ensuring smooth UI/UX transitions.
- PT SEINDO TRAVEL | *Frontend Developer Key Projects:* seindotravel.com | seindotransport.com | bemore.id | [Seindo Travel App \(PlayStore\)](https://seindo-travel-app.com) (December 2022 – December 2024)

- **Payment Integration:** Integrated **Midtrans** and **Xendit**, utilizing **SWR Mutation** to handle payment status in real-time (auto-update "Paid" status) without page reloads.
- **Git Strategy & Workflow:** Designed a structured **Git Branching** strategy for the development team, significantly minimizing merge conflicts.
- **Cross-Platform App:** Developed the high-performance ticket booking mobile application (**React Native**) and E-Commerce websites ("The Creative Kit", "Bemore").

TECHNICAL PROJECTS (Fullstack & Innovation)

MODIMINDS (EdTech Platform) | *Fullstack Engineer*

- **AI Integration:** Developed an innovative *Smart Question Generator* feature using **OpenAI API** and **NestJS** to automatically generate practice questions from study materials.
- **DevOps:** Performed independent infrastructure setup and deployed applications to **VPS** using **Docker** to ensure stable backend performance.

PSP3USU (Sistem Manajemen Fakultas) | *Fullstack Engineer*

- **Location Services:** Built a digital attendance system with precise *Geofencing* features using **OpenStreetMap** (Cost-efficient alternative) and **NestJS**, replacing manual attendance processes.
- **System Digitization:** Designed a centralized, fully integrated task management system to improve faculty administrative efficiency.
- **Infrastructure:** Executed infrastructure setup and deployment to VPS (Contabo/Alibaba Cloud) independently using **Docker** and **GitHub Actions**.

EDUCATION

State University of Medan (Universitas Negeri Medan) *Bachelor of Education in Informatics and Computer Engineering (July 2020 – June 2024)*

- **GPA:** 3.71 / 4.00
- **Thesis:** Development of an Artificial Intelligence-Based Android Application for Adaptive Learning Support Assessment Systems.
